

Perennial Ryegrass

Arnold

A legendary grass deserves a legendary name.

The Palmer family of quality ryegrasses lives up to the standards of legendary golfer Arnold Palmer, making it a favorite with golf course superintendents. Its rich, dark green color makes it perfect for use in tees, roughs or fairways, especially in cool season climates and for winter overseeding in southern states.

Palmer is extremely wear tolerant and is endophyte enhanced for natural insect resistance. Palmer III has an especially low thatch tendency and performs exceptionally by itself or in a mixture.

Palmer III, Prelude III Perennial Ryegrass fairways

CasaBlanca Golf Resort
Masquite Nevada

Performance Characteristics

- Improved resistance to grey leaf spot.
- Rich dark green color
- Medium to high turf density
- Medium growth rate results in fewer clippings.
- Fine textured leaf with improved mowability.
- Rapid germination 3-7 days
- Developed by Rutgers University

- AREA OF ADAPTATION FOR A PERENNIAL TURF
- ▨ RECOMMENDED FOR WINTER OVERSEEDING DORMANT BERMUDA GRASS
